

R-IFIX-IN200

GAS POWERED INSULATION
NAILER 80-200 mm

Professional insulation nailer, 80-200 mm.

FEATURES AND BENEFITS

Work speed - embedding directly into the substrate without the need for drilling into the substrate and insulating material

Automatic gas retrieval from a container, which is sufficient for approximately 750 embedments

Highest work safety with the embedder, protection against unintended firing of the gas charge

Battery-powered embedder, allowing for 4000 embedments at a temperature of approximately +20°C

No power cords increase safety and work comfort. High efficiency, up to 800 embedments per hour with a shot energy of 90 J

BASE MATERIALS

Concrete C12/C55-C35/C45

Reinforced concrete

R-IFIX-IN200

GAS POWERED INSULATION
NAILER 80-200 mm

The R-IFIX-IN200 gas nailer for insulation can generate power of 90J. With automatic gas feeder it's able to shoot 800 times in one hour. Thanks to fuel cell solution it's able to shoot up to 1000 shots with one can. Thanks to no power cords it's very safe tool with high quality of comfort.

APPLICATIONS

Mineral wool boards

Glass wool

Lightweight thermal insulation boards

Styrofoam boards

Polyurethane boards

Wood wool boards
