

Roof

Windtight and rainproof on the outside

Installation of underlay and roof membranes - with SOB

- Apply the membrane with the lettering facing you

- Fix the membrane above the adhesive joint using a stapler

- Lay the second membrane
- Overlap the membranes by approx. 10 cm
- Remove both backing strips

- Press the bond firmly down in the application area
- Install battens

Windtight and rainproof on the outside

How it should look:

See **Tips and tricks for installation**
P. 102-104

- **Protruding roll core ①** protects Majcoat SOB up to the very last metre
- **Cutting aid ② bonding aid ③ and twin-adhesive zone with adhesive applied on both sides ④** save time

Roof

Windtight and rainproof on the outside

Tips and tricks

- Mount counter battens in the direction of the supporting structure - directly on the supporting structure, e.g. rafters
- **Important:** counter battens must rest on the underlay with their complete surface

- Mount counter battens directly on boarding or underlays which have been laid flush

- Mount using suitable screws (e.g. full thread)
- Sufficient pressure resistance of heat insulation
- Wood-based softboards must be declared as under-roof /underlay boards
- Water carrying layer must be the same height at all points

- The use of nail sealing tape is recommended for effecting weather protection
